1 What makes Craig Cook good at Math

Professor Cook claimed that the ability to think logically and draw conclusions logically is one reason why he is good at math. Also, the fact that he is able to look for patterns and the next step in problems help him as a mathematician.

2 What stops Craig Cook from being better at Math

The one word Professor Cook answered to this question was complacency. Also, he said that he sometimes wrongly assumes things about math questions because he is too lazy to look certain definitions up. Lastly, he said that the lack of drive hinders him from being better at math.
