## WORK EXPERIENCE

### **INTERNSHIP - THESIS** | ISOMAT S.A. , THESSALONIKI, GREECE

Sept 2018 - Present | Production Manager Trainee

The tasks I was assigned entail individual projects supporting the optimization of manufacturing flows. Indicative examples of such projects include:

- Reconfiguration of the warehouse layout and of the inventory planning activities. The project completion has led to reduction of average daily material orders by 85 percent (80 employees positively influenced, 7 directly-73 indirectly, financial benefits uncalculated as yet)
- Personnel allocation to shifts securing seamless manufacturing operations
- Currently working on the development of a hybrid dual 'make to stock' and 'make to order' inventory management system. Data and experience collected from this project will be used as empirical evidence for my University thesis.

### **INTERNSHIP** | ALBATROS SPA AND RESORT HOTEL (Family Business) , CRETE, GREECE
