### ABSTRACT

This document presents the instructions needed to prepare the **2 page- extended abstract (850-1000 words)** in length including figures and references). The various components of your extended abstract [title, text, heads, etc.] are already defined on the style sheet, as illustrated by the portions given in this document. A concise abstract is required. The abstract (in one paragraph of 150 words or less) should state briefly the purpose of the research, the essential new information, the principal results and major conclusions. The abstract must be able to stand-alone and references to the manuscript should therefore be avoided. Extended Abstracts must be written in English. (Use "Arial" font, size 10pt for the abstract texts). Pages should not be numbered.

**Keywords:** please list a maximum of 5 keywords separated by commas and full stop at the end.

### 1 INTRODUCTION

Please follow the format described here and demonstrated by example with regard to placement of extended abstract title, length and width of text, and page numbering. These instructions serve as an example for proper manuscript production. The figures can be in color since the extended abstract is published online.

The authors of the accepted abstracts must submit the extended abstract before the deadline through the congress web site. All standard extended abstract components have been specified for three reasons:

- ease of use when formatting individual extended abstracts,
- automatic compliance to electronic requirements that facilitate the concurrent or later production of electronic products,
- and conformity of style throughout the extended abstract.

Margins, column width, line spacing, and type styles are built-in; examples of the type styles are provided throughout this document and are identified in red boldface, within parentheses, following the example. You can delete this sample text and replace it with the text of your extended abstract. However please note that extended abstract must strictly follow this sample, and therefore we strongly recommend you that you keep an initial version of this file for reference.

First, confirm that you have the correct template for your paper size. Please use A4 size paper, in one column format with "Arial" font. Margins are Left: 2.0cm and Right: 1.8cm. The template is used to format your extended abstract and style the text. All margins, column width, line spaces, and text fonts are prescribed; please do not change them.

## 32 2 HEADINGS AND BODY OF TEXT

### 33 2.1 Sub-headings

### 34 2.2 Sub-sub-headings

35 Please preserve the style of the headings, text font and line spacing in order to provide a uniform style for the  
36 Proceedings.

### 37 2.3 Body of text

38 The normal texts should be set in 10pt “Arial” with a leading (interline spacing) of 10pt and a single spacing.  
39 Lines are single-spaced. The paragraphs should be justified at left and right margins of the text.

## 40 3 USING THE TEMPLATE FOR SEVERAL COMPONENTS

### 41 3.1 Equations

42 Equations should be centered and numbered consecutively, as in Eq.1. An alternative method is given in Eq.2  
43 for long sets of equations where only one referencing equation number is wanted.

$$F((A - B_n)^2, C_n^2, D) = \frac{1}{(23\pi)^{\frac{1}{3}}} \int \frac{d^3 b_n}{3w_i} \delta^4(A - B_n - D + c_n) \quad (1)$$

44 where,

$$A = [E_{11}, E_{12}, *E_{21}, *E_{22}] \\ - [E_{12}, E_{13}, *E_{22}, *E_{23}] \quad (2)$$

### 45 3.2 Lists

46 Lists can be provided using either numbers or bullets:

- 47 1. List item 1 like this;
- 48 2. List item 2 is an example of a longer list item that wraps to a second line, where the second line is indented.

49 The example for bulleted items like this:

- 50 • List item 1;
- 51 • List item 2.

### 52 3.3 Tables and figures

53 Tables and figures should appear in one column of a page and be numbered consecutively. Figures and texts  
54 may appear on the same page, and a centered caption should appear directly beneath the figure. It is preferable  
55 that figures be mounted in portrait style and figure captions are no longer than two lines. On figures showing  
56 graphs, both axes must be clearly labeled (including units if applicable). Tables should be designed to have a  
57 uniform style throughout the extended abstract, following the style shown in Table 1.

Table 1: Caption heading for a table should be placed at the top of the table and within table width.

	<b>A</b>	<b>B</b>	<b>C</b>	<b>D</b>
<b>A</b>	Aa	Ab	Ac	Ad
<b>B</b>	Ba	Bb	Bc	Bd
<b>C</b>	Ca	Cb	Cc	Cd
<b>D</b>	Da	Db	Dc	Dd
<b>E</b>	Ea	Eb	Ec	Ed

58 Authors are advised to prepare their figures in either black and white or color. Please prepare the figures in high  
59 resolution (300 dpi) for half-tone illustrations or images. Pictures must be sharp enough otherwise they will be  
60 rejected. Figures must be originals, computer-generated or drafted, and placed within the text area where they  
61 are discussed. Figure 1 shows one example.

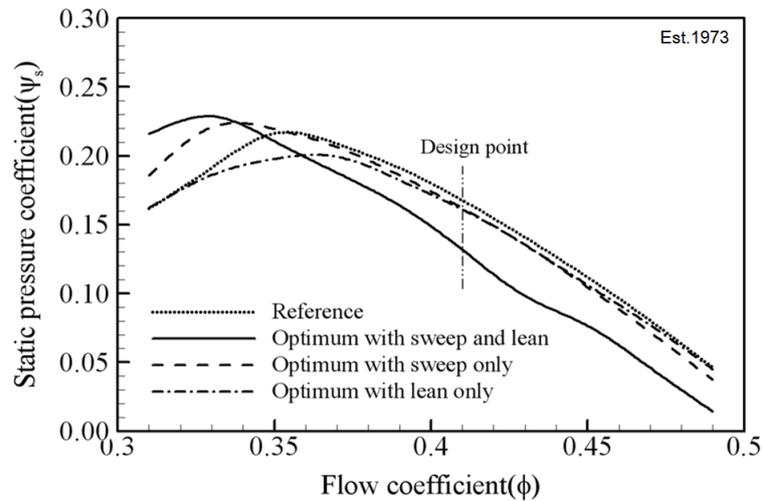

Figure 1: The caption heading for a figure should be placed below the figure and within figure/illustration width.

### 62 3.3.1 Footnotes

63 Footnotes are denoted by a character superscript in the text<sup>1</sup>.

### 64 3.3.2 Units

65 Use either SI (MKS) as primary units. English or CGS units may be used as secondary units (in parentheses).  
66 Avoid combining SI and CGS units. This often leads to confusion because equations do not balance dimension-  
67 ally. If you must use mixed units, clearly state the units for each quantity that you use in an equation. Do not mix  
68 complete spellings and abbreviations of units. Spell out units when they appear in text.

## 69 4 REFERENCES

70 References should appear together at the end of the extended abstract, listed alphabetically by last name of the  
71 first author. Thereafter sorting is made by co-authors and year. However, in the text, sorting is done by year  
72 (Vardy et Brown, 1996; Tijsseling et al., 2008; Chaudhry, 2014). References in the text consist of the author  
73 name and publication year in parentheses, as found in Tijsseling et al. (2008). If several references are cited  
74 collectively, they are enclosed on parentheses with no additional parentheses around dates. All references listed  
75 should be cited in the text. Example reference citations are provided at the end of this paper.

## 76 5 CONCLUSIONS

77 If the formatter still needs to create a component which is not prescribed here, please incorporate applicable  
78 criteria that follow the styles provided (e.g., spacing and typeface).

## 79 6 ACKNOWLEDGEMENTS

80 This is where one acknowledges funding bodies, etc. Note that section numbers are not required for Acknowl-  
81 edgements and References.

<sup>1</sup>Just like this one.

<sup>82</sup> We appreciate the cooperation and efforts of all authors in producing the Proceedings. This will be a great  
<sup>83</sup> congress following the tradition of our sponsoring organizations.
