email

Abstract

1 The abstract paragraph should be indented 1/2 inch (3 picas) on both the left- and
2 right-hand margins. Use 10 point type, with a vertical spacing (leading) of 11 points.
3 The word **Abstract** must be centered, bold, and in point size 12. Two line spaces
4 precede the abstract. The abstract must be limited to one paragraph.

5 1 Submission of papers to IASEAI'26

6 Please read the instructions below carefully and follow them faithfully.

7 1.1 Style

8 Papers to be submitted to IASEAI'26 must be prepared according to the instructions presented here.
9 Papers may only be up to **ten** pages long, including figures. Additional pages *containing references*
10 *and optional appendices* do not count as content pages. Papers that exceed the page limit will not be
11 reviewed, or in any other way considered for presentation at the conference.

12 Authors are required to use the IASEAI L^AT_EX style files obtainable at the IASEAI website as indicated
13 below. Altering the style files may be grounds for rejection.

14 1.2 Retrieval of style files

15 The style files for IASEAI and other conference information are available on the website at

16 <https://iaseai.org/iaseai26>

17 The file `iaseai26.pdf` contains these instructions and illustrates the various formatting requirements
18 your IASEAI paper must satisfy.

19 The only supported style file for IASEAI'26 is `iaseai26.sty`, for L^AT_EX 2_ε. A template for Microsoft
20 Word is also supported.

21 The L^AT_EX style file contains three optional arguments: `final`, which creates a camera-ready copy,
22 `preprint`, which creates a preprint for submission to, e.g., arXiv, and `nonatbib`, which will not
23 load the `natbib` package for you in case of package clash.

24 **Preprint option** If you wish to post a preprint of your work online, e.g., on arXiv, using the IASEAI
25 style, please use the `preprint` option. This will create a nonanonymized version of your work with
26 the text “Preprint. Work in progress.” in the footer. This version may be distributed as you see fit, as
27 long as you do not say which conference it was submitted to. Please **do not** use the `final` option,
28 which should **only** be used for papers accepted to IASEAI.

29 At submission time, please omit the `final` and `preprint` options. This will anonymize your
30 submission and add line numbers to aid review. Please do *not* refer to these line numbers in your
31 paper as they will be removed during generation of camera-ready copies.

32 The file `iaseai26.tex` may be used as a “shell” for writing your paper. All you have to do is replace
33 the author, title, abstract, and text of the paper with your own.

34 The formatting instructions contained in these style files are summarized in Sections 2, 3, and 4
35 below.

36 **2 General formatting instructions**

37 The text must be confined within a rectangle 5.5 inches (33 picas) wide and 9 inches (54 picas) long.
38 The left margin is 1.5 inch (9 picas). Use 10 point type with a vertical spacing (leading) of 11 points.
39 Times New Roman is the preferred typeface throughout, and will be selected for you by default.
40 Paragraphs are separated by $\frac{1}{2}$ line space (5.5 points), with no indentation.

41 The paper title should be 17 point, initial caps/lower case, bold, centered between two horizontal
42 rules. The top rule should be 4 points thick and the bottom rule should be 1 point thick. Allow $\frac{1}{4}$ inch
43 space above and below the title to rules. All pages should start at 1 inch (6 picas) from the top of the
44 page.

45 For the final version, authors’ names are set in boldface, and each name is centered above the
46 corresponding address. The lead author’s name is to be listed first (left-most), and the co-authors’
47 names (if different address) are set to follow. If there is only one co-author, list both author and
48 co-author side by side.

49 Please pay special attention to the instructions in Section 4 regarding figures, tables, acknowledgments,
50 and references.

51 **3 Headings: first level**

52 All headings should be lower case (except for first word and proper nouns), flush left, and bold.

53 First-level headings should be in 12-point type.

54 **3.1 Headings: second level**

55 Second-level headings should be in 10-point type.

56 **3.1.1 Headings: third level**

57 Third-level headings should be in 10-point type.

58 **Paragraphs** There is also a `\paragraph` command available, which sets the heading in bold, flush
59 left, and inline with the text, with the heading followed by 1 em of space.

60 **4 Citations, figures, tables, references**

61 These instructions apply to everyone.

62 **4.1 Citations within the text**

63 The `natbib` package will be loaded for you by default. Citations may be author/year or numeric, as
64 long as you maintain internal consistency. As to the format of the references themselves, any style is
65 acceptable as long as it is used consistently.

66 The documentation for `natbib` may be found at

67 <http://mirrors.ctan.org/macros/latex/contrib/natbib/natnotes.pdf>

Figure 1: Sample figure caption.

68 Of note is the command `\citet`, which produces citations appropriate for use in inline text. For
69 example,

```
70 \citet{hasselmo} investigated\dots
```

71 produces

```
72 Hasselmo, et al. (1995) investigated...
```

73 If you wish to load the `natbib` package with options, you may add the following before loading the
74 `iaseai26` package:

```
75 \PassOptionsToPackage{options}{natbib}
```

76 If `natbib` clashes with another package you load, you can add the optional argument `nonatbib`
77 when loading the style file:

```
78 \usepackage[nonatbib]{iaseai26}
```

79 As submission is double blind, refer to your own published work in the third person. That is, use “In
80 the previous work of Jones et al. [4],” not “In our previous work [4].” If you cite your other papers
81 that are not widely available (e.g., a journal paper under review), use anonymous author names in the
82 citation, e.g., an author of the form “A. Anonymous” and include a copy of the anonymized paper in
83 the supplementary material.

84 4.2 Footnotes

85 Footnotes should be used sparingly. If you do require a footnote, indicate footnotes with a number¹
86 in the text. Place the footnotes at the bottom of the page on which they appear. Precede the footnote
87 with a horizontal rule of 2 inches (12 picas).

88 Note that footnotes are properly typeset *after* punctuation marks.²

89 4.3 Figures

90 All artwork must be neat, clean, and legible. Lines should be dark enough for purposes of reproduction.
91 The figure number and caption always appear after the figure. Place one line space before the figure
92 caption and one line space after the figure. The figure caption should be lower case (except for first
93 word and proper nouns); figures are numbered consecutively.

94 You may use color figures. However, it is best for the figure captions and the paper body to be legible
95 if the paper is printed in either black/white or in color.

¹Sample of the first footnote.

²As in this example.

Table 1: Sample table title

Part		
Name	Description	Size (μm)
Dendrite	Input terminal	~ 100
Axon	Output terminal	~ 10
Soma	Cell body	up to 10^6

96 **4.4 Tables**

97 All tables must be centered, neat, clean and legible. The table number and title always appear before
98 the table. See Table 1.

99 Place one line space before the table title, one line space after the table title, and one line space after
100 the table. The table title must be lower case (except for first word and proper nouns); tables are
101 numbered consecutively.

102 Note that publication-quality tables *do not contain vertical rules*. We strongly suggest the use of the
103 `booktabs` package, which allows for typesetting high-quality, professional tables:

104 <https://www.ctan.org/pkg/booktabs>

105 This package was used to typeset Table 1.

106 **4.5 Math**

107 Note that display math in bare TeX commands will not create correct line numbers for sub-
108 mission. Please use LaTeX (or AMSTeX) commands for unnumbered display math. (You
109 really shouldn't be using $\$$ anyway; see <https://tex.stackexchange.com/questions/503/why-is-preferable-to> and
110 <https://tex.stackexchange.com/questions/40492/what-are-the-differences-between-align-equation-and-displaymath> for more infor-
111 mation.)
112

113 **4.6 Final instructions**

114 Do not change any aspects of the formatting parameters in the style files. In particular, do not modify
115 the width or length of the rectangle the text should fit into, and do not change font sizes (except
116 perhaps in the **References** section; see below). Please note that pages should be numbered.

117 **5 Preparing PDF files**

118 Please prepare submission files with paper size "US Letter," and not, for example, "A4."

119 Fonts may cause problems. Your PDF file must only contain Type 1 or Embedded TrueType fonts.
120 Here are a few instructions to achieve this.

- 121 • You should directly generate PDF files using `pdflatex`, which is the default if you use
122 Overleaf.
- 123 • You can check which fonts a PDF files uses. In Acrobat Reader, select the menu
124 Files>Document Properties>Fonts and select Show All Fonts. You can also use the program
125 `pdffonts` which comes with `xpdf` and is available out-of-the-box on most Linux machines.
- 126 • `xfig` "patterned" shapes are implemented with bitmap fonts. Use "solid" shapes instead.
- 127 • The `\bbold` package almost always uses bitmap fonts. You should use the equivalent AMS
128 Fonts:

129 `\usepackage{amsfonts}`

130 followed by, e.g., `\mathbb{R}`, `\mathbb{N}`, or `\mathbb{C}` for \mathbb{R} , \mathbb{N} or \mathbb{C} . You can also
131 use the following workaround for reals, natural and complex:

```
132     \newcommand{\RR}{\mathbb{R}} %real numbers
133     \newcommand{\Nat}{\mathbb{N}} %natural numbers
134     \newcommand{\CC}{\mathbb{C}} %complex numbers
```

135 Note that `amsfonts` is automatically loaded by the `amssymb` package.

136 If your file contains type 3 fonts or non embedded TrueType fonts, we will ask you to fix it.

137 5.1 Margins in L^AT_EX

138 Most of the margin problems come from figures positioned by hand using `\special` or other
139 commands. We suggest using the command `\includegraphics` from the `graphicx` package.
140 Always specify the figure width as a multiple of the line width as in the example below:

```
141     \usepackage[pdftex]{graphicx} ...
142     \includegraphics[width=0.8\linewidth]{myfile.pdf}
```

143 See Section 4.4 in the graphics bundle documentation ([http://mirrors.ctan.org/macros/](http://mirrors.ctan.org/macros/latex/required/graphics/grfguide.pdf)
144 [latex/required/graphics/grfguide.pdf](http://mirrors.ctan.org/macros/latex/required/graphics/grfguide.pdf))

145 A number of width problems arise when L^AT_EX cannot properly hyphenate a line. Please give LaTeX
146 hyphenation hints using the `\-` command when necessary.

147 References

148 References follow the acknowledgments in the camera-ready paper. Use unnumbered first-level
149 heading for the references. Any choice of citation style is acceptable as long as you are consistent. It
150 is permissible to reduce the font size to `small` (9 point) when listing the references. Note that the
151 Reference section does not count towards the page limit.

159 Technical Appendices and Supplementary Material

160 Technical appendices with additional results, figures, graphs and proofs may be submitted with
161 the paper submission before the full submission deadline (see above), or as a separate PDF in the
162 ZIP file below before the supplementary material deadline. There is no page limit for the technical
163 appendices.
