

B-set X: Catchy Title

Descriptive Subtitle

July 22, 2016

Goals

By the end of this building block, you should feel comfortable with the following concepts:

- Here
- Are
- Some
- Concepts
 - Including some things about tools when necessary

Overview and Orientation

Here's some context for why we're doing this. You'll talk about applications in our final project, as well as some other ways it can be used in engineering. You'll give us a glimpse of the reasoning behind your decisions, so even if the process stuff isn't driven by students we'll still see some of how it's done.

Some Content

Here there is some written explanation of content. There are lots of

$$\int_a^b \text{mathexamples}$$

and

```
1 %code examples
2 %in pretty boxes
```

(please give us code examples programming is hard)

1. Now we start the problems

Extra Resources:

- here are some links to resources
- there might be videos by the teaching team
- or by Khan Academy or something
- there could also be some cool written resources
- and extra problems for if you get stuck or if you want to go into more depth
