7 1 Typesetting instructions – Summary

8 Please comply with the following instructions when preparing your article for a TGDK issue.

9 Minimum requirements

- 10 ■ Use pdf_latex and an up-to-date L^AT_EX system.
- 11 ■ Use further L^AT_EX packages and custom made macros carefully and only if required.
- 12 ■ Use the provided sectioning macros: `\section`, `\subsection`, `\subsubsection`,
- 13 `\paragraph`, `\paragraph*`, and `\subparagraph*`.
- 14 ■ Provide suitable graphics of at least 300dpi (preferably in PDF format).
- 15 ■ Use BibTeX and keep the standard style (`plainurl`) for the bibliography.
- 16 ■ Please try to keep the warnings log as small as possible. Avoid overfull `\hboxes` and any kind
- 17 of warnings/errors with the referenced BibTeX entries.
- 18 ■ Use a spellchecker to correct typos.

19 Mandatory metadata macros

20 Please set the values of the metadata macros carefully since the information parsed from these

21 macros will be passed to publication servers, catalogues and search engines. Avoid placing macros

22 inside the metadata macros. The following metadata macros/environments are mandatory:

- 23 ■ `\title` and, in case of long titles, `\titlerunning`.
- 24 ■ `\author`, one for each author, even if two or more authors have the same affiliation.

¹ Optional footnote, e.g. to mark corresponding author

42:2 Dummy title

- 25 ■ `\authorrunning` and `\Copyright` (concatenated author names)
- 26 The `\author` macros and the `\Copyright` macro should contain full author names (especially
- 27 with regard to the first name), while `\authorrunning` should contain abbreviated first names.
- 28 ■ `\ccsdesc` (ACM classification, see <https://www.acm.org/publications/class-2012>).
- 29 ■ `\keywords` (a comma-separated list of keywords).
- 30 ■ `\relatedversion` (if there is a related version, typically the “full version”); please make sure
- 31 to provide a persistent URL, e. g., at arXiv.
- 32 ■ `\begin{abstract}... \end{abstract}` .

33 Please do not ...

34 Generally speaking, please do not override the `tgdk-v2021`-style defaults. To be more specific, a
35 short checklist also used by Dagstuhl Publishing during the final typesetting is given below. In
36 case of **non-compliance** with these rules Dagstuhl Publishing will remove the corresponding
37 parts of L^AT_EX code and **replace it with the `tgdk-v2021` defaults**. In serious cases, we may
38 reject the L^AT_EX-source and expect the corresponding author to revise the relevant parts.

- 39 ■ Do not use a different main font. (For example, the `times` package is forbidden.)
- 40 ■ Do not alter the spacing of the `tgdk-v2021.cls` style file.
- 41 ■ Do not use `enumitem` and `paralist`. (The `enumerate` package is preloaded, so you can use
- 42 `\begin{enumerate}[a]` or the like.)
- 43 ■ Do not use “self-made” sectioning commands (e. g., `\noindent{\bf My Paragraph}`).
- 44 ■ Do not hide large text blocks using comments or `\iffalse ... \fi` constructions.
- 45 ■ Do not use conditional structures to include/exclude content. Instead, please provide only the
- 46 content that should be published – in one file – and nothing else.
- 47 ■ Do not wrap figures and tables with text. In particular, the package `wrapfig` is not supported.
- 48 ■ Do not change the bibliography style. In particular, do not use author-year citations. (The
- 49 `natbib` package is not supported.)

50 This is only a summary containing the most relevant details. Please read the complete
51 document “LIPICs: Instructions for Authors and the `lipics-v2021` Class”² for all details and
52 don’t hesitate to contact Dagstuhl Publishing (<mailto:publishing@dagstuhl.de>) in case of
