

Title placeholder: An example of a title using sentence case capitalization

Author One¹, First Last², First Last³

- 1 Affiliation One, See examples below, Laramie, WY
- 2 Department, University, City, ST
- 3 Company/Organization, City, ST

Abstract Your abstract goes here. Remember not to include any citations within the abstract.

Introduction

Please type your introduction here. We have included further instructions and template materials in this section of the report. The other sections have blindtext to mimic the look and feel of a complete submission. Remember to delete all instructions and blindtext from your report before submitting.

Subsection example

While we require the main headings in the report to remain the same, please feel free to use subheadings where necessary. **Please use sentence case capitalization for all titles and headings.**

Citations

You will need to add your citations in BibTeX format in the "Bibliography.bib" file. Please go there for instructions on how to do that. Here are some examples of common in-text citations:

Last (2020) found that... Here is an example of an in-text citation in parenthesis (Last, 2020). It is also possible to add more (before citation: Last, 2020, after citation). References will not appear in the references section unless they are cited in the text.

Figures and Tables

Figures: subsection

Include media in the Media folder. Name files clearly, Figure1.png, Figure2.png, Table1.png, etc.

Here is a small figure example, see Figure 1.

Here is an example of a larger figure, spanning the whole page width (Figure 2).

Tables

Finally, please build tables using this template (Table 1). All tables should maintain this color scheme. It is also possible to expand the width of the table (Table 2). For more info on these tables: <https://www.overleaf.com/learn/latex/Tables>.

For more complicated tables, we suggest using the nicematrix package as in Table 3.

Methods

Hello, here is some text without a meaning. This text should show what a printed text will look like at this place. If you read this text, you will get no information. Really? Is there no information? Is there a difference

Figure 1. Example of a small figure, spanning a column width. Note that [ht] helps to control image placement. Also note that labelling the figure allows for dynamic in-text references.

between this text and some nonsense like “Huardest gefburn”? Kjift – not at all! A blind text like this gives you information about the selected font, how the letters are written and an impression of the look. This text should contain all letters of the alphabet and it should be written in of the original language. There is no need for special content, but the length of words should match the language. Hello, here is some text without a meaning. This text should show what a printed text will look like at this place. If you read this text, you will get no information. Really? Is there no information? Is there a difference between this text

Heading 1	Heading 2	Heading 3
Text for 1	Middle 1	12345
Text for 2	Middle 2	67890
Text for 3	Middle 3	12345
Text for 4	Middle 4	67890
etc.	etc.	etc.

Table 1. Small table with three columns and 5 rows. Please keep colors and formatting the same, except for adjusting row widths.

and some nonsense like “Huardest gefburn”? Kjift – not at all! A blind text like this gives you information about the selected font, how the letters are written and an impression of the look.
